JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

The weekly report of the municipal health department shows among foreigners 1 new case of smallpox.

No cases of plague have been officially reported among human beings. Plague-infected rats continue to be found, and deaths from plague are said to have occurred among natives. All possible precautions are being insisted upon by this office to prevent infection of vessels bound to American ports, by means of rats or cargo.
